LEFATHER DERİ A.Ş.

2022-2023

Pricing is calculated based on a minimum order quantity of 1000 units.

Pricing will vary for less or more quantities.

Prices do not include shipping and customs fees.

In this catalogue, we only included the products we exported most to Europe in 2022 and 2023. For more products and your special production requests, visit our website or contact us.

THE LEATHER STRAP

Our leather straps are made of full-grain leather which is the purest and least processed form of leather - this is because the leather is made from the upper part of the animal hide.

Since the leather is full-grain, it also means that each product comes with a unique imprint of the skin from which it is made - and with the right care the strap only gets better looking over time.

NO HOLES

The leFather Belt is a belt without holes, instead, you'll find a micro-adjustable trackline sewn into the back.

The belt can be tightened with 0.5-centimeter precision – 600% more adjustable than a standard belt with 5 holes.

FREEDOM TO CHOOSE

All straps fit all buckles. So, whether you choose straps of Full-Grain leather, canvas or both, all parts always fit together.

How it works

Our Hanger works in the same way as our buckles.

A small piece of metal catches the track on the back of the straps, which is how it is locked. Pushing the small handle on the side of each entrance releases the straps again.

LEFATHER BELTS

At leFather we have transformed the classic gentlemen's belt. Instead of holes, the leFather Trackline™ is sewn into the back of all our straps.

The trackline allows our belts to be tightened with 0.5 cm precision - so you can enjoy maximum comfort throughout the day. It also enables our straps to fit even if you gain or lose weight.

Without holes, our straps suffer minimal wear. We've taken up the fight with expensive brand belts with short lifespans.

Our leather straps are made of true Full-Grain leather. With the right care, real leather only gets better looking through its years. It's a perfect match with our lefatherTrackline™.

All straps fit all buckles, and you can easily expand your collection with new models that suit your wardrobe.

- We think that's reasonable luxury.

LEFATHER - TRACKLINE™

The leFather Trackline™ is sewn into all our straps and enables all belts to be tightened with 5 millimeters precision.

The trackline is produced in hard plastic. It lasts a lifetime when used correctly.

Macbook Sleeves

Made for 13", 14", 15" and 16"

Minimalist Design

The design of our Sleeves is clean and timeless. Every detail matters.

The combination of good design, professional craftsmanship and high-quality materials can be felt at first touch.

Quality materials

All our Sleeves are made from full grain leather - leather with minimal treatment of the skin before the tanning process. The leather gets a natural patina over time.

Therefore, no two sleeves are alike - each skin has its own character. Various scars and imperfections make your Sleeve completely unique.

(((o))) RFID

How Do I Protect My Contactless Card?

You should purchase an RFID Blocking Wallet.

Do RFID Wallets Really Work? How Does RFID Wallet Work?

Yes. RFID prevents the microchip from working by reducing the reader's signal strength. When the electromagnetic field is blocked, they prevent skimmers from receiving signals from your documents. This means your data is kept safe by making it difficult to read ID card, credit card and passport information.

How Remotely Can Someone Scan Your Credit Card?

Although banks claim that the RFID chips in cards are encrypted to protect information, it has been proven that homemade or easily purchased scanners can scan the cardholder's name and number. (A cell phone-sized RFID reader powered by 30 dBm (decibels per milliwatt) can receive card information from 10 feet away.

How Do I Know If My Wallet Has RFID Blocking?

The easiest way to tell if your wallet is RFID protected is to put the credit card in front of an RFID scanner / reader while placing it in your wallet. If you see any signal being transmitted, you can understand that the wallet is not RFID protected.

Do RFID Wallets Disrupt Credit Cards?

No, RFID wallets do not disrupt credit cards. Still, it's important to keep your credit cards separate in any wallet. You should avoid placing them near any magnets that could erase data on the magnetic stripe.

LEFATHER DERI A.S.

Introducing leFather as a company experienced in the areas of leather accessories manufacturing with a tradition of multiple generations. While our production takes place in Bolu province that has been hearth of leather tanning and producing accessories with excellent craftsmanship our sales office is located in the business center of Turkey , Istanbul city.

LEFATHER DERI A.S. is both set company availibity for retail and wholesale structure of orders domestically and internationally.

Get to Know Us

leFather is an Istanbul-based company that grew up in Bolu, the city of Turkey's leather industry,acting with the statement that you cannot become a master of a job that you have not apprenticed,

For many years, entrepreneur founders with knowledge and experience in the export and leather manufacturing sector have implemented the leFather brand, which adopts a customer-oriented service approach.

Everyone in the team is an expert in their field and carefully selected, all operational processes from production to export and marketing are at the level of professionalism.

It is carried on with the meticulousness of being an example to the whole sector with its team strength and perspective that supports domestic production.

By offering %100 full grain leather accessories in various sizes and colors,leFather comes with the passion of serving multiple selections to its B2B business partners. By handling all the production in Bolu,Turkey ,our manufactured full grain leather belts,bags,wallets,shoes for both men and women are manufactured in the highest quality that has been developed through gained experience of more than a decade.

With the focus on designing the classy pieces of leather goods to be worn in perfect condition overmore than multiple years besides reflecting the unique quality of both Turkish and Italian classy vibes together, appreciates the process of leather manufacturing of leFather in the best way.

Industry and Us

leFather has brought a new breath to the industry with designs that combine quality and elegance.

leFather, producing from Turkey to the world and growing day by day,

It has 3 leather workshops, a head office, an export office and warehouses abroad.

All products of the brand, which stands out with modern and configurable designs in line with customer demands, are 100% full grain leather, handmade and domestic production.

Natural and sustainable, environmentally friendly herbal tannins are used in the production of all products.

Expanding its product range with firm steps in line with tastes and demands, leFather impresses its customers with its wide product range thanks to its high volume production capacity.

The brand, which set out with the sensitivity of domestic production in order to contribute to the country's economy, has also reached a loyal customer portfolio in a short time with its pre-sales and after-sales customer services.
